

**Angela Di Febraro** is Full Professor of Transportation Engineering at the University of Genoa since 2005. Previously, she has been Professor in Control and Transportation Engineering at the Polytechnic of Turin, and before that a Research Assistant at the University of Genoa. Born in 1963 in Genoa, she got a Laurea Degree in Electronic Engineering (1987), and PhD in Electronic and Computer Engineering, both at the University of Genoa. At a European level, she currently holds the office of Italian National Delegate in the Horizon 2020 Programme Committee of the Societal Challenge “Smart, green, and integrated transport”, and she is a member of the STRIA Governance Group. Author of more than 200 scientific papers, mostly published in international journals/conferences, she participated in several research projects. Her transport research interests focused on major aspects about planning, control, and optimisation at a system-level (with special reference to safety, sustainability, intermodality, and Intelligent Transport Systems).
