- Presentation from Members' and open discussion

6. AOB, NEXT STEPS, CLOSING

- Date of next meeting
- Other

- **17 Projects (Call 2017)**
 - Launched from September 2017
- **Governing Board (27/10/2017)**
 - Approval AWP 2018
 - Approval MAAP Part A:

Comments received from S2R UR-ID WG members: ERA, EURNEX, UITP, UIC, CEN/CENELEC

- **S2R 2018 Open Call info day**
 - 12 December 2017, the Egg, Brussels
 - Matchmaking event + meet the coordinators
- **Other ongoing activities**
 - Evaluation Associated Members Call (realignment of activities)
 - Preparation of Annual Work Plan 2019
 - Quick-wins for TRA and InnoTrans 2018
 - KPIs

Number	Subject of tender	Indicative scope	Maximum budget
1 - contract	Study on alternative communication bearers in the railway environment	<p>The activity shall assess the railway environment and identify new alternative bearer beyond established cellular technologies (UMTS/HSPA, LTE, LTE-A, etc.) or other access technologies (WiFi/802.11, SatCom, etc.), which are or expected to become available for on-board to trackside communication needs. The availability of the alternative bearers might be restricted to certain areas (for example train stations, shunting yards, high-speed lines, different terrains, etc.). The alternative bearers could rely on or leverage already available infrastructure or equipment alongside the railway tracks. Some potential candidates include but are not limited to data over power lines, free space optical communications, etc.</p> <p>The results of the study are expected to enrich the set of access network options for infrastructure managers, when they deploy their new adaptable communication system and leverage the benefits of alternative bearers to address specific needs of their planned rollout of advanced services and applications.</p>	€ 150,000

Number	Subject of tender	Indicative scope	Maximum budget
2 - contract	Study on railway bridge dynamics and the interface with rolling stock	<p>Under supervision of the JU, in collaboration with the ERA, the study should collect bridge and train data, as well as calculation and validation methods, including:</p> <ul style="list-style-type: none">• calculation methods to describe the dynamic interface vehicle – bridge;• vehicle design assessment method;• validation of calculation methods;• load models and vehicle design limits;• proposal and suggestions for standardisation and regulation.	€ 250,000

Number	Subject of tender	Indicative scope	Maximum budget
3 - contract	Support to ERTMS European Action Plan to pave the way for the deployment of the future S2R Innovative Solutions	<p>This activity aims at supporting the implementation of the ERTMS European Action Plan, published by the European Commission in June 2017.</p> <p>Under the supervision of the JU and together with Commission Services (DG Move), inter alia, the contractor will perform tasks such as support the ERA Change Control Management process' and related update of specification documentation (including test specifications); Identification of the existing sets of engineering rules regarding transitions between systems; Contribution to the technical review of trackside deployment of ERTMS in cross-border sections; Contribution to the drafting/updating of technical specifications for upcoming ERTMS communication system set to replace GSM-R and to the appraisal of the impact on interoperability of its roll-out.</p>	€ 1,600,000

Number	Subject of tender	Indicative scope	Maximum budget
4 - contract	Study on use of fuel cell hydrogen in railway environment	<p>This activity aims at analysing the business case of hydrogen and fuel cell usage in the rail environment, both in passenger train and freight.</p> <p>The investigation could for example include analyses on the CO2 performance (through Life Cycle Analysis techniques) of current rail powertrain solutions and demonstrate the specific emissions saving that can be achieved by replacing conventional technologies.</p>	€ 270,000
TOTAL			€ 2,270,000

INTERNATIONAL UNION
OF RAILWAYS

unity, solidarity, universality

Shift2rail URID – what is it and how can we help?

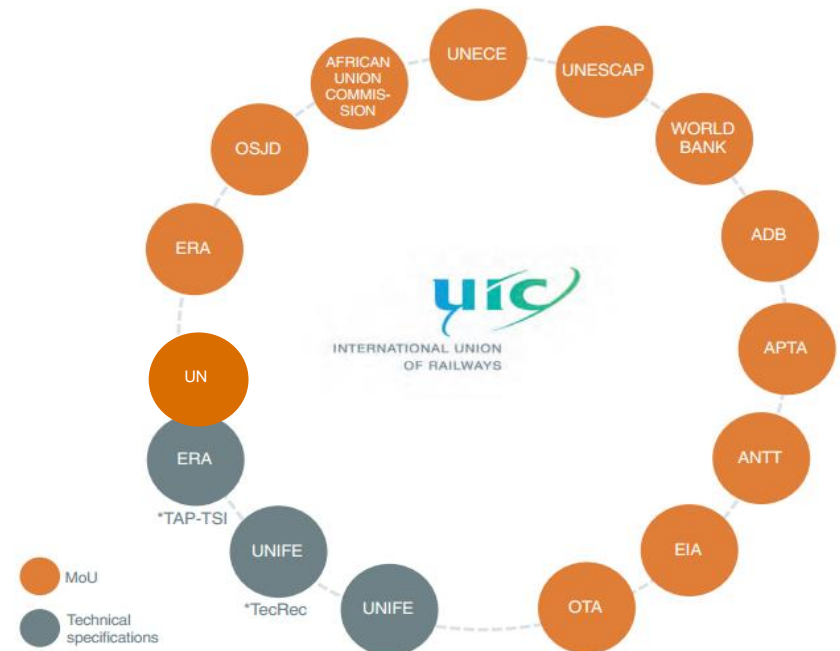

22nd November 2017

Firstly some helpful background

at the service of constituent companies and in international cooperation

- **1922** Intergovernmental conference in Genoa, Italy
- **October 1922** Constitutive Assembly of UIC (Paris): UIC Statutes adopted by 51 Railway administrations from 29 countries (Europe, Asia)
- **2017** 200 constituent stakeholders (115 in Europe) from 95 **countries**

- 3,000 billion passenger kilometres
- 10,000 billion tonnes kilometres
- 1 million kilometres of lines
- 7 million rail personnel
- Cooperation with over 100 institutions
- 500 UIC Leaflets - becoming International Railway Solutions **IRS**

UIC's main objectives are :

- Creating a framework for innovation and anticipation of future challenges
- Supporting constituent companies in the delivery of an efficient and attractive railway system
- Facilitating the development of rail as a competitive mode of transport
- Develop and publish a range of documents – is recognised as an SSO

Standardisation in the rail environment...

Working together

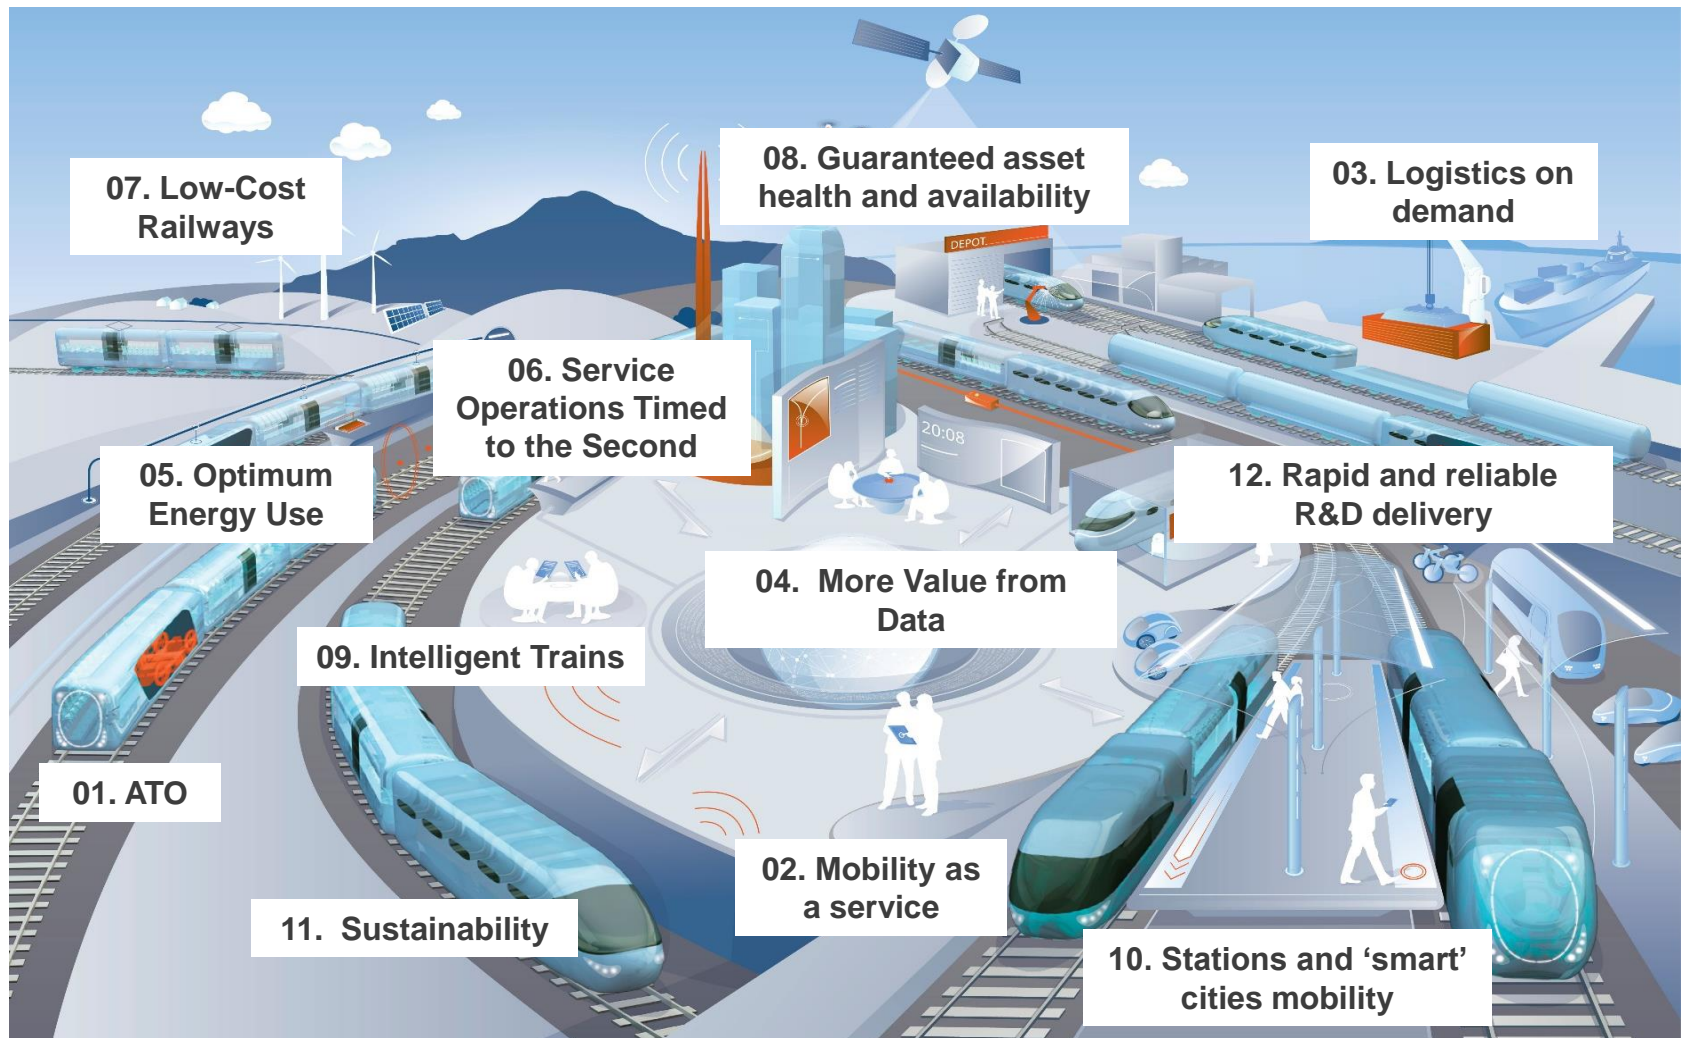

Organisations producing different types of deliverables shall work together, in mutual respect and consistency for the benefit of the whole railway sector

- References from UIC documents are contained in some TSIs
- UIC-IEC cooperation agreement signed in 2015
- UIC-ISO cooperation agreement signed in December 2016
- UIC-CEN_CLC revised cooperation agreement should be signed in a couple of weeks

The **requirements** end of the spectrum

Capabilities for the Future European railway system

The 3 R&I Strategic Clusters

The clusters highlight where within the system the capabilities will have an impact:

- **Customers and Markets:** achieve customer satisfaction with the railway services / develop existing markets and to evolve new opportunities
- **Society and Economy:** fostering social and economic integration thanks to the ability of rail to transport people and goods from A to B.
economically sustainable in their operations
- **Environment and Energy:** support environmental sustainability / encourage the procurement and use of clean energy

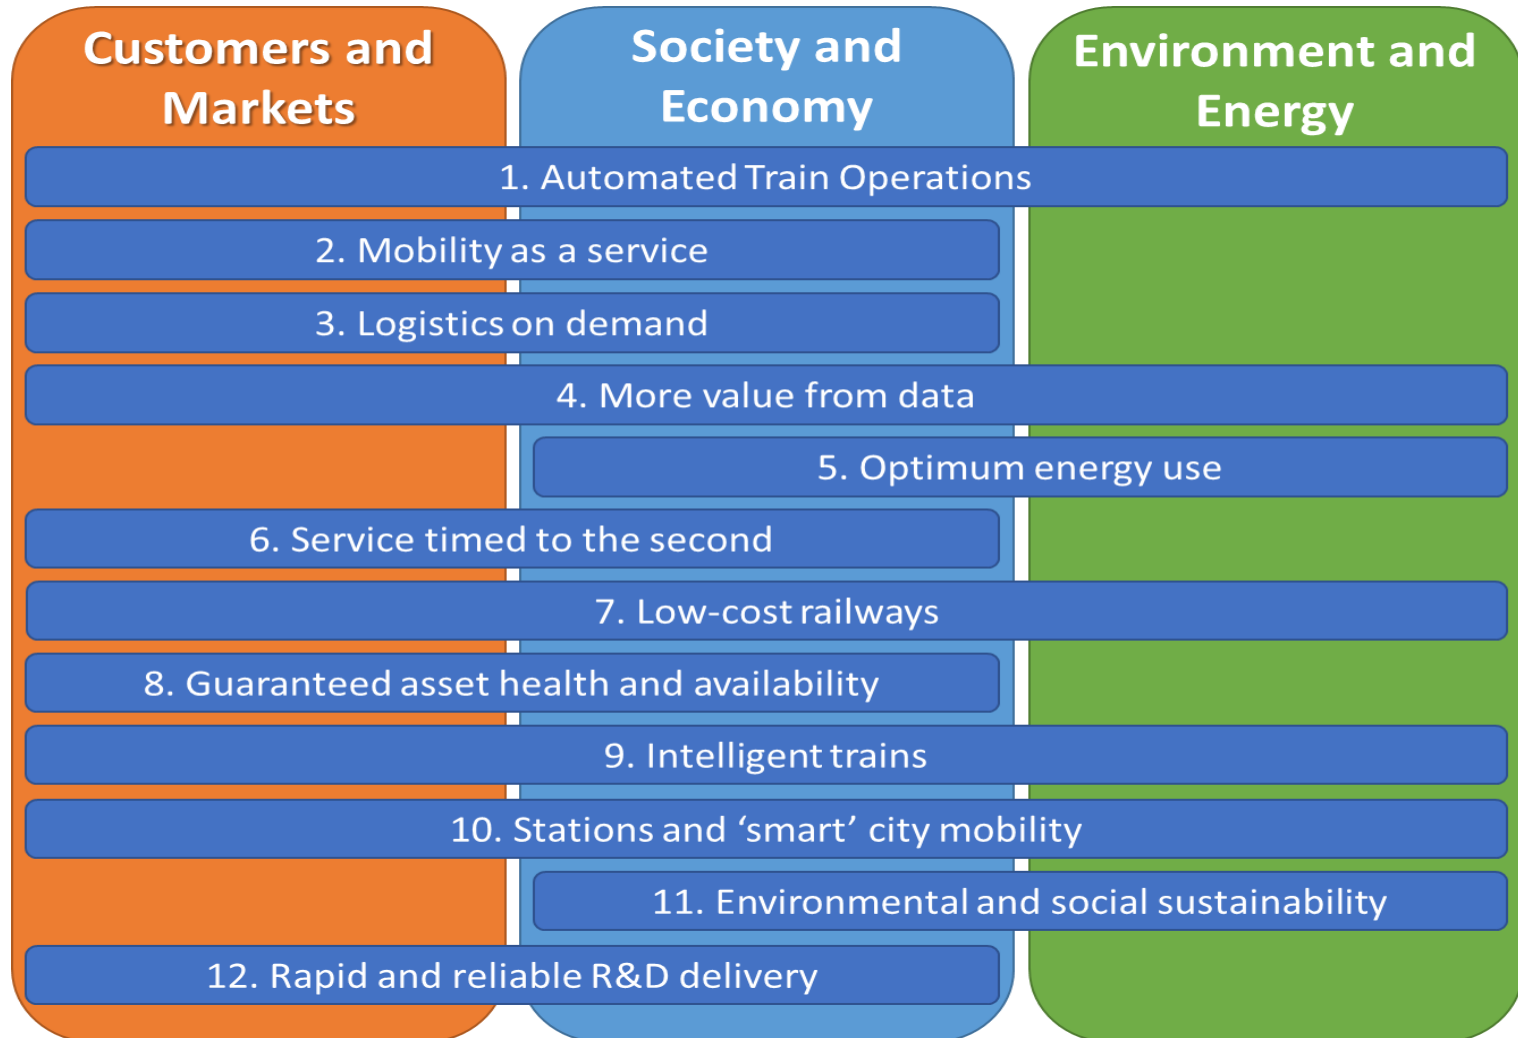

**Customers and
Markets**

**Society and
Economy**

**Environment and
Energy**

The 3 R&I Strategic Clusters

The clusters highlight where within the system the capabilities will have an impact:

- **Much of this has been integrated into the recent S2R MAAP**
- **Can also be found, alongside the Key Enablers developed by UNIFE and the requirements identified by UITP in the ERRAC 2050 Vision that is planned for approval tomorrow and publication soon**

Here to help, in a number of ways...

- **Bringing a wide range of stakeholders together:**
 - specifying requirements (such as the recent development of the 'capabilities')
 - managing some possible joint tests, demonstrators, and/or assessment surveys
 - engaging in the dissemination/implementation of deliverables by developing and publishing 'standards' on behalf of the sector

- **UIC should be considered as a key partner**

Consider UIC as a S2R partner...

- We can focus on the operations, services, rail system design and maintenance aspects
- Harmonisation and transparency with CEN_CENELEC and ETSI are highly considered thanks to agreements in force and regular cooperation meetings
- No one organisation can do it all. There needs to be joined up thinking with CCA WA 3.2 and JPCR – it will need a consistent and efficient programme
- We can ensure that there is a nominated key contact for all standardisation topics

Where does UR-ID fit in?

- UR-ID has a key role to play
- There must be discussion, the flow of information must be 2-way and everyone a chance to say what they want to achieve
- Much in the same way that CEN_CENELEC have JPCR, then perhaps UR-ID needs to become the programming or at least a prioritising group for S2R?
- The S2R programme needs to fit the needs of the stakeholders that will be using the deliverables
- Let's build the end-user interface here

 - ◆ Structure and interesting topics

- ✧ On-going or possible collaboration
 - ◆ Some key topics

CEN-CENELEC Structure

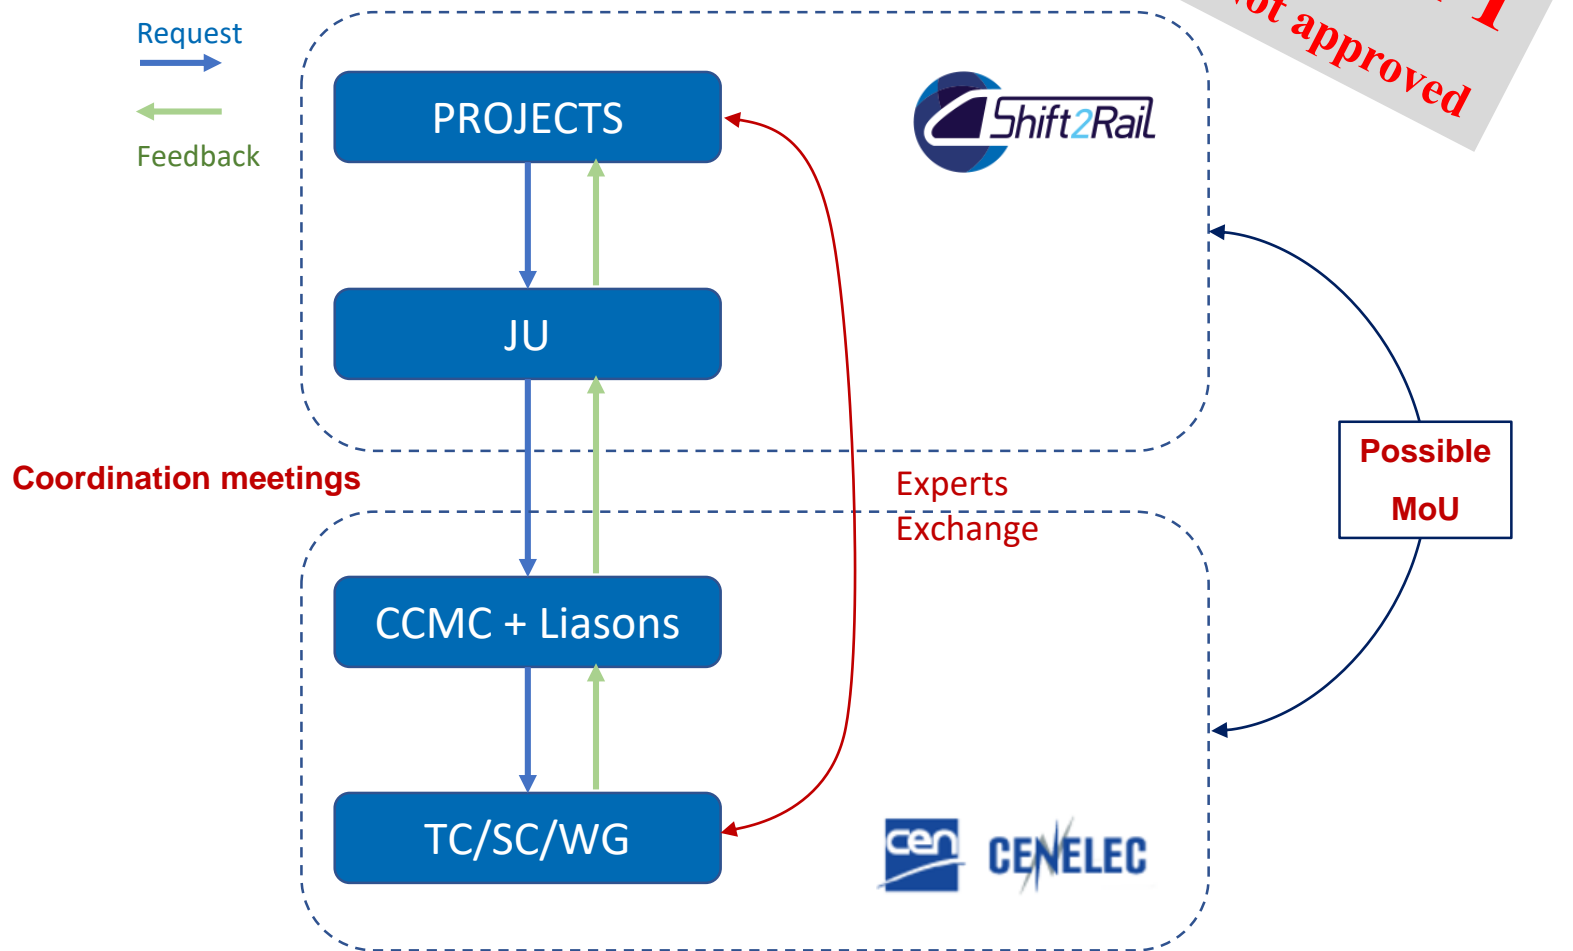

Topics in the scope of TC9X

S2R	Topic	Project	TC9X
IP1	Innovative TCMS	Roll2Rail, Connecta, Safe4Rail	TC9X/WG15
	Innovative Communication	Roll2Rail, Connecta, (X2Rail-1, Mistral)	SC9XB
	Driver desk (display controller)	Connecta	TC9X/WG12
IP2	Formal methods, formal specifications	X2RAIL2, ASTRail	TC9X – SC9XA
	IT Security	X2Rail-1, Cyrail	TC9X, TC9X/SG24
IP3	Total Energy Management	Roll2Rail, In2Rail, Fine1, OPEUS	TC9X/SG23 SC9XC
IP4	Ontology for requirements management and passenger services	IT2Rail, GoF4R, Attractive, Co-active, ST4RT	TC9X
IP5	DAS-ATO	ARCC	SC9XB
CCA	Standardisation Energy	IMPACT-2 FINE1, OPEUS	TC9X

Topics in the scope of TC256

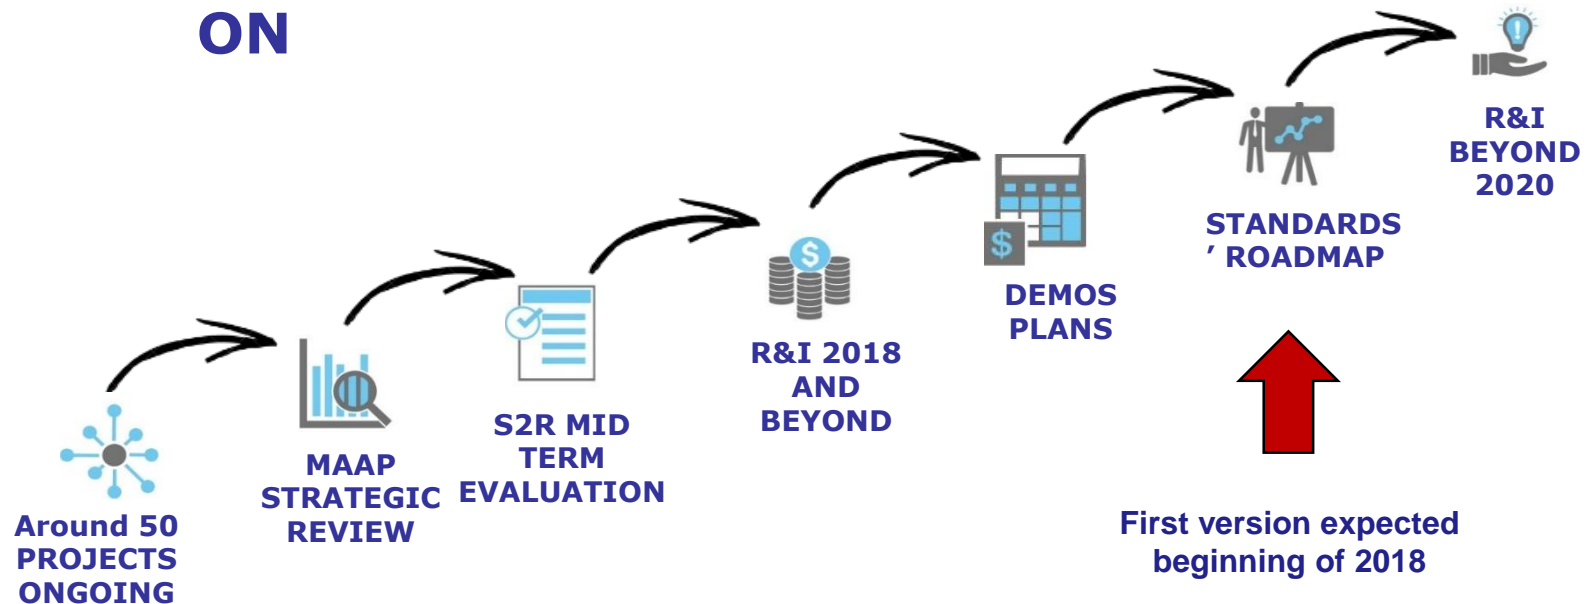

- ✧ Development of new technological concepts towards the next generation of rolling stock, applied to major subsystems such as Car-body, Running Gear, Brakes, Doors and Modular interiors
- ✧ Composite body structures ('Refresco') Joining techniques, fatigue and fire performance properties
 - ◆ Note: Refresco is not a Shift2Rail project.
- ✧ Proposal of reduced and harmonized requirements for braking systems ('Refresco')
- ✧ Rolling noise separation for TSI noise testing ('Refresco')
- ✧ Dynamic impact on structures (bridge loading, new train combinations, formations)
- ✧ Future stations and accessibility

Standardisation in Shift2Rail

WHAT'S GOING ON

S2R R&I results and process leading to standards and regulation

Work in progress

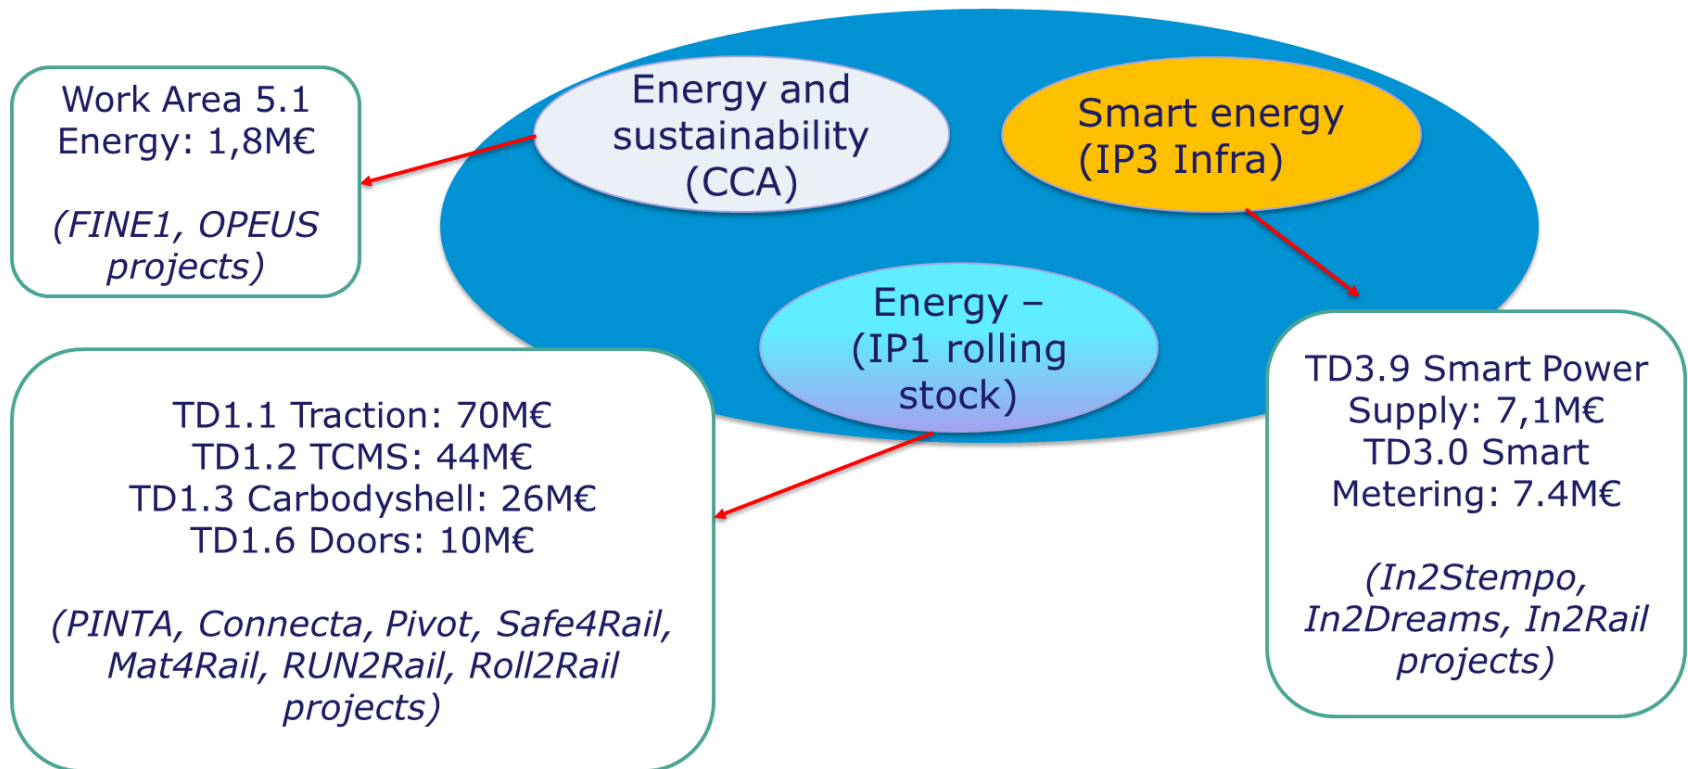

Key topics for collaboration

✧ Proposal

- ◆ Focus on key topics where a good possibility of collaboration and synergy has been identified
- ◆ Organise topical meetings where it is possible to go more in details

Key Topic: Energy – Research in progress

Key Topic: Energy – Existing standards

- ✧ EN 16001:2009 - Energy Management Systems
- ✧ EN 15900:2010 - Energy Efficiency Services
- ✧ EN 16258:2012 - Methodology for calculation and declaration of energy consumption and GHG emissions of transport services (freight and passengers).
- ✧ EN 50463:2017 - Railway applications - Energy measurement on board trains - Part 1, 2,3,4,5
- ✧ TS 50591:2013 - Specification and verification of energy consumption for railway rolling stock

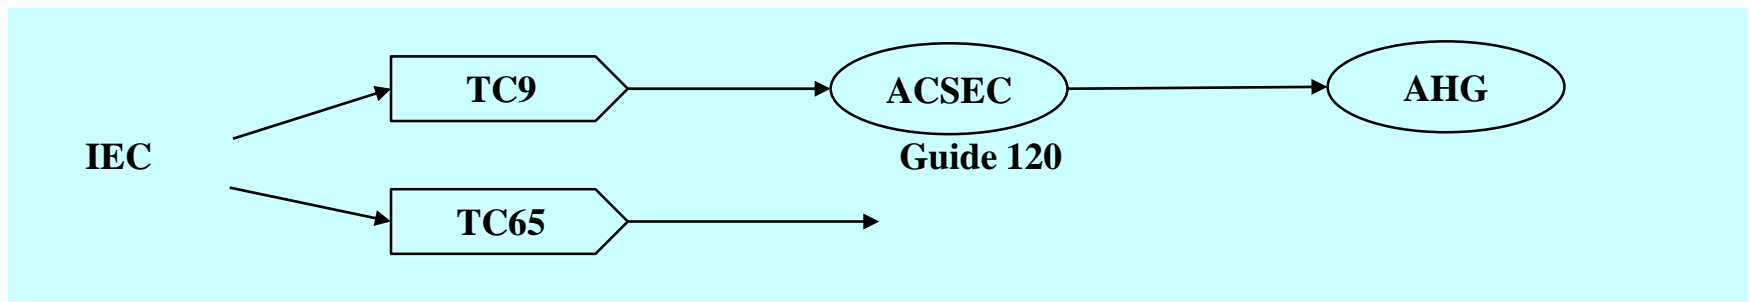

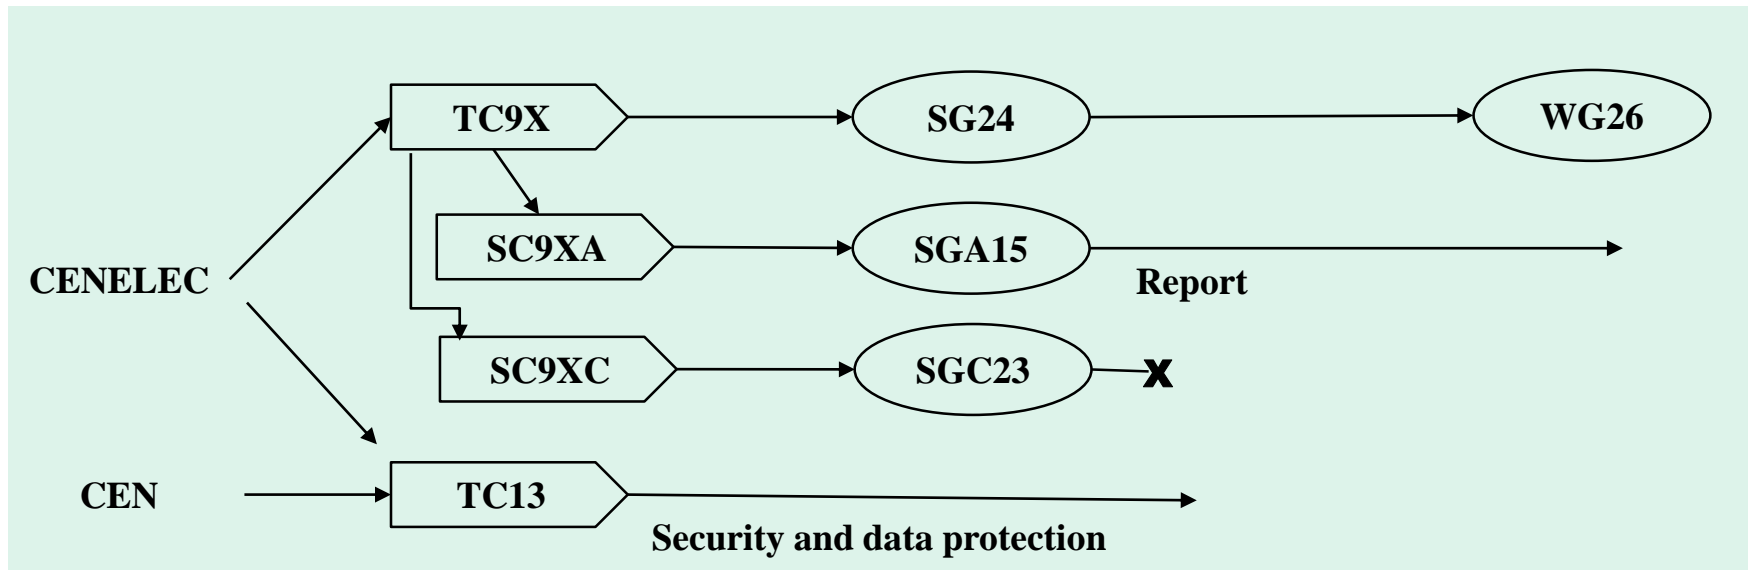

Key Topic: Cybersecurity – Current projects: X2RAIL-1 and CYRAIL

TC9X Decision 56/01

Noting the published result “TC9X/Sec00930/MTG” and the related discussion at the plenary meeting, TC9X decides to nominate Paolo Umiliacchi as representative of TC9X to the advisory board of CYRAIL and X2Rail-1.

- ✧ No meetings held so far
- ✧ Documents sent:
 - ◆ TC9X_Sec0932_MTG (SG 24 report) – This is a kind of introductory summary
 - ◆ Annex A to TC9X_Sec0932_MTG - SG24 Survey Report to TC9X
 - ◆ SC9XA_Sec1043_DC_Attachment1 – Report of the Convenor of SGA16 to SC9XA
 - ◆ IEC ACSEC Guide 120, produced by the Advisory Committee on Security of IEC
- ✧ Additional requested document:
 - ◆ Identified as IEC TC65 TR 63069 (document 65_687e_CD)
 - Industrial-process measurement, control and automation - Framework for functional safety and security
- ✧ Other relevant document from TC 65: IEC 62443 (several parts)

Key Topic: Cybersecurity – Standardisation activities
