

Curriculum Vitae

Kaminsky, Ralf

CURRENT POSITION

Name of company

Siemens Mobility GmbH

Job position

Vice President Technology Collaborations

PROFESSIONAL BACKGROUND

From 1994 until 2000 Ralf Kaminsky worked as scientific researcher at the Institute of Railway Construction and Operation, University of Hannover and worked in several projects on operational planning and timetabling.

In 2001 he joined Siemens Mobility and held different positions mainly in the field of mainline signalling. Among others he led the strategy department for the business in Germany, was responsible for the business with on-board equipment and was Director for Mainline Regulation & Standards within the Product and Portfolio Management. Ralf currently heads the group for Technology Collaborations in the CTO department.

EDUCATION AND TRAININGS:

Ralf Kaminsky studied Civil Engineering with focus on railway operation and construction and achieved graduation Diploma (Dipl.-Ing.) in 1994. In 2001 he achieved PHD (Dr.-Ing) in the field of railway timetabling and simulation of railway operation

EXTRAS:

All along Ralf represents Siemens in different Committees (UNIFE, UNISIG; VDB) and EU funded projects. Recently he was intensively involved in the set up of the ERJU especially in the newly build System Pillar.
