Eu.Gen-SCI.6	Head	1.2 Impressum	
Eu.Gen-SCI.7	Info	Publishers: Europe's Rail Joint Undertaking https://rail-research.europa.eu EULYNX Initiative A full list of the EULYNX Partners can be found on www.eulynx.eu/index.php/members	
Eu.Gen-SCI.8	Info	Responsible for this document: EU-Rail System Pillar Trackside Assets Control and Supervision domain	
Eu.Gen-SCI.9	Info	Copyright EULYNX Partners All information included or disclosed in this document is licensed under the European Union Public Licence EUPL, Version 1.2 or later.	
Eu.Gen-SCI.10	Head	1.3 Purpose	
Eu.Gen-SCI.11	Info	The purpose of the document is the specification of generic requirements for the development of the EULYNX System. The generic requirements complement the specific interface and subsystem requirements.	
Eu.Gen-SCI.12	Info	This document describes: <ul style="list-style-type: none">• generic functional requirements for the interface SCI-XX between an EULYNX field element Subsystem and the Subsystem - Electronic Interlocking• generic functional requirements for the interface SCI-XX between an adjacent system and the Subsystem - Electronic Interlocking which are describing only the interface parts of each communication partner	
Eu.Gen-SCI.13	Info	This document is intended for the following users: <ul style="list-style-type: none">• safety authorities• infrastructure managers• safety assessors• signalling system suppliers• validators	
Eu.Gen-SCI.14	Info	This document is the basis for the implementation by the supplier and for approval by the infrastructure manager.	
Eu.Gen-SCI.590	Info	This document is applicable for both the EU-Rail System Pillar target architecture and the EULYNX architecture. The document is delivered as a single specification fitting both the System Pillar documentation sets and the EULYNX documentation sets. EU-Rail System Pillar is the technical authority for this document.	
Eu.Gen-SCI.15	Head	1.4 Applicable standards and regulations	
Eu.Gen-SCI.16	Info	A list of applicable standards and regulations used in EULYNX is listed in the EULYNX Reference Document List [Eu.Doc.12].	
Eu.Gen-SCI.17	Head	1.5 Applicable documents	
Eu.Gen-SCI.18	Info	The current versions of documents used as input or related to this document are listed in the EULYNX Documentation Plan [Eu.Doc.11]. The relationships between the documents are displayed in the Appendix A1 Documentation plan and structure [Eu.Doc.11_A1].	
Eu.Gen-SCI.19	Head	1.6 Terms and abbreviations	
Eu.Gen-SCI.20	Info	The terms and abbreviations are listed in the EULYNX Glossary [Eu.Doc.9].	
Eu.Gen-SCI.21	Head	1.7 Variability management	

ID	Type	Requirement Part 1	Requirement Part 2																		
Eu.Gen-SCI.22	Info	This document describes harmonised requirements. Variability management is not applicable. The specific applicability of requirements is captured in individual interface specifications.																			
Eu.Gen-SCI.23	Head	1.8 Definition of object types																			
Eu.Gen-SCI.24	Info	The following definition for object types is applied in this document:																			
Eu.Gen-SCI.25	Info	• "Req" - This denotes a mandatory requirement.																			
Eu.Gen-SCI.26	Info	• "Info" - This denotes additional information to help understand the specification. These objects do not specify any additional requirements.																			
Eu.Gen-SCI.27	Info	• "Head" - This denotes chapter headings.																			
Eu.Gen-SCI.28	Head	1.9 Modelling																			
Eu.Gen-SCI.29	Info	The section "Generic requirements for SCI" follows a model based systems engineering process using Systems Modelling Language (SysML) and defines the functional system requirements for the EULYNX field element Subsystem in stimulus-response form. Furthermore the information objects (stimuli and responses) exchanged over the interfaces of the EULYNX field element Subsystem, Subsystem - Electronic Interlocking and the adjacent systems are defined.																			
Eu.Gen-SCI.30	Info	The diagrams presented in this document are modelled in SysML [SysML].																			
Eu.Gen-SCI.31	Info	The rules for the interpretation of the model based parts of specification are defined in [Eu.Doc.29].																			
Eu.Gen-SCI.32	Info	In chapter 3 "Generic requirements for SCI" the functional system requirements, defined in the form of a SysML model in the PTC Integrity Modeler are depicted as a surrogate of this model in the form of DOORS-objects.																			
Eu.Gen-SCI.33	Info	A requirement thereby consists of the respective SysML model element, for instance a SysML diagram, and if necessary an additional extension of the requirement.																			
Eu.Gen-SCI.34	Info	In the column "Requirement Part 1" the particular SysML model element is depicted and in the column "Requirement Part 2" the corresponding extension of the definition is given. The stated object type normally applies both to "Requirement Part 1" and to "Requirement Part 2".																			
Eu.Gen-SCI.35	Info	There are requirements with type "Req" given, where the column "Requirement Part 2" or a part of it is provided with the heading "Information". In this case, the defined type only applies to the column "Requirement Part 1" and the part of "Requirement Part 2", which is not labelled as "Information".																			
Eu.Gen-SCI.36	Head	2 Conditions of use																			
Eu.Gen-SCI.37	Info	The specifications defined in this document shall follow the requirements of the EULYNX System Architecture Specification [Eu.Doc.16].																			
Eu.Gen-SCI.524	Req	All references to Eu.Doc.20 refer to Generic interface and subsystem requirements version 4.0 (3.A).																			
Eu.Gen-SCI.38	Head	3 Generic requirements for SCI																			
Eu.Gen-SCI.220	Head	3.1 Field element interfaces																			
Eu.Gen-SCI.221	Head	3.1.1 Interface between Subsystem - Electronic Interlocking and EfeS (SCI-XX EfeS)																			
Eu.Gen-SCI.409	Head	3.1.1.1 SCI-XX EfeS - Logical Viewpoint																			
Eu.Gen-SCI.410	Head	3.1.1.1.1 SCI-XX EfeS - Logical Context																			
Eu.Gen-SCI.411	Info	[Package] SCI-XX EfeS - Logical Context [Logical Viewpoint - Interface Definition] bdd [Package] SCI-XX EfeS - Logical Context [Logical Viewpoint - Interface Definition]  <pre> classDiagram class SCI_XX_EfeS { <<block>> <<logical structural entity>> SCI_XX_EfeS } class Subsystem_Electronic_Interlocking { <<block>> <<logical structural entity>> Subsystem_Electronic_Interlocking } class EULYNX_field_element_Subsystem { <<block>> <<logical structural entity>> EULYNX_field_element_Subsystem } SCI_XX_EfeS "1" --> "1" Subsystem_Electronic_Interlocking : SCI_XX_EfeS SCI_XX_EfeS "1" --> "1" EULYNX_field_element_Subsystem : SCI_XX_EfeS </pre>																			
Eu.Gen-SCI.401	Head	3.1.1.2 SCI-XX EfeS - Information Flows																			
Eu.Gen-SCI.526	Info	The InformationFlows between F_EST_EfeS and F_SCI_EfeS_Sec are specified in Eu.Doc.20.

Eu.Gen-SCI.403	Info	<p>[Package] SCI-XX EfeS - Information Flows [Interface Requirements - Information Objects]</p> <p>bdd [Package] SCI-XX EfeS - Information Flows [Interface Requirements - Information Objects]</p> <pre> classDiagram class Cd_PDI_Version_Check { <<information object>> signal } class Msg_Reset_PDI { <<information object>> signal } class Cd_Initialisation_Request { <<information object>> signal } class Msg_Start_Initialisation { <<information object>> signal } class Msg_Initialisation_Completed { <<information object>> signal } class Msg_PDI_Available { <<information object>> signal } class Cd_Release_PDI_for_Maintenance { <<information object>> signal } class Msg_PDI_Not_Available { <<information object>> signal } class Cd_Close_PDI { <<information object>> signal } class CloseReason { <<valueType (enumeration)>> } Cd_PDI_Version_Check --> Msg_Reset_PDI : signal Cd_Initialisation_Request --> Msg_Start_Initialisation : signal Cd_Initialisation_Request --> Msg_Initialisation_Completed : signal Cd_Initialisation_Request --> Cd_Close_PDI : signal Cd_Release_PDI_for_Maintenance --> Cd_Close_PDI : signal Cd_Close_PDI --> CloseReason : signal </pre>	
Eu.Gen-SCI.404	Info	The shown information objects for this Interface can be found in SCI-XX - Information Flows.	
Eu.Gen-SCI.222	Head	3.1.1.3 SCI-XX EfeS - Functional Viewpoint	
Eu.Gen-SCI.437	Head	3.1.1.3.1 Definition of time values	
Eu.Gen-SCI.438	Req	Con_tmax_PDI_Connection	If the establishment of the PDI connection, measured from the sending of Cd_PDI_Version_Check to the receipt of Msg_Initialisation_Completed, is not completed within Con_tmax_PDI_Connection, the safe communication shall be terminated. A diagnostic message shall be issued. The Safe communication is then re-established. The default value for Con_tmax_PDI_Connection is 20 s.
Eu.Gen-SCI.439	Head	3.1.1.3.2 SCI-XX EfeS - Functional Context	
Eu.Gen-SCI.555	Info	<p>[Package] SCI-XX EfeS - Functional Context [Interface Definition - UseCases]</p> <p>uc [Package] SCI-XX EfeS - Functional Context [Interface Definition - UseCases]</p> <pre> useCaseDiagram actor Subsystem_Electronic_Interlocking actor EULYNX_field_element_Subsystem useCase IFUC1_1 useCase IFUC1_2 Subsystem_Electronic_Interlocking --> IFUC1_1 IFUC1_1 --> EULYNX_field_element_Subsystem </pre>	
Eu.Gen-SCI.440	Info	SCI-XX EfeS IFUC1.1: Establish PDI connection	The Subsystem-UseCase SCI-XX EfeS IFUC1.1: Establish PDI connection defines the process to establish a PDI connection between Subsystem - Electronic Interlocking and EULYNX field element Subsystem.

ID	Type	Requirement Part 1	Requirement Part 2
Eu.Gen-SCI.444	Info	<p>SCI-XX EfeS IF SD 1.1.1</p> <p>sd [Interaction] SCI-XX EfeS IFUC1.1 Establish PDI connection - Main Success Scenario [SCI-XX EfeS IF SD 1.1.1]</p> <pre> sequenceDiagram actorUser as User actorInterlocking as Subsystem - Electronic Interlocking actorEulynx as :EULYNX field element Subsystem User->>actorInterlocking: Cd_PDI_Version_Check actorInterlocking-->>User: Msg_PDI_Version_Check {< Con_tmax_PDI_Connection} actorInterlocking->>actorEulynx: Cd_Initialisation_Request actorEulynx-->>User: Msg_Start_Initialisation note over User: ref [Interaction] Report status [SD 1.3.1] actorEulynx-->>actorInterlocking: Msg_Initialisation_Completed </pre> <p>Main Success Scenario: Establish PDI connection</p> <p>Precondition: The EULYNX field element Subsystem is in state INITIALISING, in substate WAITING_FOR_PDI_OR_MAINTENANCE. The SCP connection is established. Ready to establish PDI connection.</p> <p>Interaction 1.1.1.A: 1. - The EULYNX field element Subsystem receives from the Subsystem - Electronic Interlocking the request to verify the match between the transmitted PDIVer and the PDIVer present in the EULYNX field element Subsystem. 2. The PDIVer transmitted by the Subsystem - Electronic Interlocking matches the own PDIVer. 3. The EULYNX field element Subsystem reports to the Subsystem - Electronic Interlocking the used PDIVer and newly calculated CSS.</p> <p>Interaction 1.1.1.B: 4. - The EULYNX field element Subsystem receives from the Subsystem - Electronic Interlocking the request to transmit the status. 5. The EULYNX field element Subsystem notifies the Subsystem - Electronic Interlocking of the transmission of the status information. 6. The EULYNX field element Subsystem reports the status information to Subsystem - Electronic Interlocking. 7. The EULYNX field element Subsystem notifies the Subsystem - Electronic Interlocking that the transmission of the status information is complete.</p> <p>Postcondition: The EULYNX field element Subsystem is in state OPERATIONAL. The PDI connection is ESTABLISHED.</p>	This use case scenario [Interaction] Report status [SD 1.3.1] is defined in the corresponding requirements specification of the specific field element.
Eu.Gen-SCI.445	Info	<p>SCI-XX EfeS IF SD 1.1.2</p> <p>sd [Interaction] SCI-XX EfeS IFUC1.1 PDI version unequal, no retry - Alternative Scenario [SCI-XX EfeS IF SD 1.1.2]</p> <pre> sequenceDiagram actorUser as User actorInterlocking as Subsystem - Electronic Interlocking actorEulynx as :EULYNX field element Subsystem User->>actorInterlocking: Cd_PDI_Version_Check actorInterlocking-->>User: Msg_PDI_Version_Check actorInterlocking->>actorEulynx: Cd_Release_PDI_for_Maintenance </pre> <p>Alternative Scenario: PDI version is unequal, no retry</p> <p>Precondition: The EULYNX field element Subsystem is in state INITIALISING, in substate WAITING_FOR_PDI_OR_MAINTENANCE. The SCP connection is established. Ready to establish PDI connection.</p> <p>Interaction 1.1.2.A: 1. - The EULYNX field element Subsystem receives from the Subsystem - Electronic Interlocking the request to verify the match between the transmitted PDIVer and the PDIVer present in the EULYNX field element Subsystem. 2. The PDIVer transmitted by the Subsystem - Electronic Interlocking does not match the own PDIVer. 3. The EULYNX field element Subsystem notifies the Subsystem - Electronic Interlocking that the PDIVer does not match and send its own PDIVer. 4. The Subsystem - Electronic Interlocking has no other PDI version to request. 5. The EULYNX field element Subsystem receives from the Subsystem - Electronic Interlocking the request to release the PDI connection for maintenance.</p> <p>Postcondition: The EULYNX field element Subsystem is in state INITIALISING, in substate WAITING_FOR_DATA_UPDATE. The PDI connection is SUSPENDED.</p>	The postcondition is only valid in case the EULYNX field element Subsystem is configured to use MDM during initialisation. If the MDM is not used, the postcondition is the substate WAITING_FOR_NO_MAINTENANCE_TIMEOUT instead.

ID	Type	Requirement Part 1	Requirement Part 2
Eu.Gen-SCI.446	Info	<p>SCI-XX EfeS IF SD 1.1.3</p> <p>sd [Interaction] SCI-XX EfeS IFUC1.1 PDI version unequal, retry - Alternative Scenario [SCI-XX EfeS IF SD 1.1.3]</p> <pre> sequenceDiagram participant User participant SIE as Subsystem - Electronic Interlocking participant EFS as EULYNX field element Subsystem User->>SIE: Cd_PDI_Version_Check activate SIE SIE-->>User: Msg_PDI_Version_Check deactivate SIE SIE->>EFS: Cd_Close_PDI </pre> <p>Alternative Scenario: PDI version is unequal, retry</p> <p>Precondition: The EULYNX field element Subsystem is in state INITIALISING, in substate WAITING_FOR_PDI_OR_MAINTENANCE. The SCP connection is established. Ready to establish PDI connection.</p> <p>Interaction 1.1.3.A:</p> <ol style="list-style-type: none"> 1. - The EULYNX field element Subsystem receives from the Subsystem - Electronic Interlocking the request to verify the match between the transmitted PDIVer and the PDIVer present in the EULYNX field element Subsystem. 2. The PDIVer transmitted by the Subsystem - Electronic Interlocking does not match the own PDIVer. 3. The EULYNX field element Subsystem notifies the Subsystem - Electronic Interlocking that the PDIVer does not match and send its own PDIVer. 4. The Subsystem - Electronic Interlocking has another PDI version to request, 5. The EULYNX field element Subsystem receives from the Subsystem - Electronic Interlocking the request to close the PDI connection. <p>Postcondition: ---</p>	After this scenario is finished, Subsystem - Electronic Interlocking continues trying. This means that either [Interaction] SCI-XX EfeS IFUC1.1 PDI version unequal, retry - Alternative Scenario [SCI-XX EfeS IF SD 1.1.3] will occur again, or [Interaction] SCI-XX EfeS IFUC1.1 PDI version unequal, no retry - Alternative Scenario [SCI-XX EfeS IF SD 1.1.2] will occur.
Eu.Gen-SCI.441	Info	<p>SCI-XX EfeS IF SD 1.1.4</p> <p>sd [Interaction] SCI-XX EfeS IFUC1.1 CSS unequal - Alternative Scenario [SCI-XX EfeS IF SD 1.1.4]</p> <pre> sequenceDiagram participant User participant SIE as Subsystem - Electronic Interlocking participant EFS as EULYNX field element Subsystem User->>SIE: Cd_PDI_Version_Check activate SIE SIE-->>User: Msg_PDI_Version_Check deactivate SIE SIE->>EFS: Cd_Release_PDI_for_Maintenance </pre> <p>Alternative Scenario: CSS is unequal</p> <p>Precondition: The EULYNX field element Subsystem is in state INITIALISING, in substate WAITING_FOR_PDI_OR_MAINTENANCE. Eu.Gen-SCI.512	Head	3.1.1.4 SCI-XX EfeS - General Infos and Assumptions	
Eu.Gen-SCI.455	Info	When a termination of the SCP connection occurs while the PDI connection is suspended, the PDI connection is no longer considered suspended.	
Eu.Gen-SCI.456	Info	The termination or establishment of the SCP connection does not change the impermissibility of the PDI Connection to a specific EULYNX field element Subsystem.	
Eu.Gen-SCI.459	Info	The termination or establishment of the SCP connection does not change the disconnection of the PDI Connection to a specific EULYNX field element Subsystem.	
Eu.Gen-SCI.461	Info	The termination or establishment of the SCP connection does not change the availability of the EULYNX field element Subsystem for PDI Connection.	
Eu.Gen-SCI.513	Info	When the impermissibility of the PDI connection to a specific EULYNX field element Subsystem is reset while the SCP connection is available, the PDI connection will be re-established.	
Eu.Gen-SCI.514	Info	When the impermissibility of the PDI connection to a specific EULYNX field element Subsystem is reset while no SCP connection is available, the PDI connection will be re-established when the SCP connection becomes available.	
Eu.Gen-SCI.515	Info	When the PDI connection to a specific EULYNX field element Subsystem is enabled while the SCP connection is available, the PDI connection will be established.	
Eu.Gen-SCI.516	Info	When the PDI connection to a specific EULYNX field element Subsystem is enabled while no SCP connection is available, the PDI connection will be established when the SCP connection becomes available.	
Eu.Gen-SCI.517	Info	If the PDI connection to a specific EULYNX field element Subsystem is not disconnected nor impermissible, and no SCP connection is available, the primary communication partner establishes the SCP connection.	
Eu.Gen-SCI.454	Head	3.1.2 SCI-XX EfeS - Internal Behaviour of Subsystem - Electronic Interlocking	
Eu.Gen-SCI.457	Req	It shall be possible to reset the impermissibility of the PDI connection to a specific EULYNX field element Subsystem by a trigger to the Subsystem - Electronic Interlocking.	
Eu.Gen-SCI.458	Req	It shall be possible to disable or disconnect the PDI connection to a specific EULYNX field element Subsystem by a trigger to the Subsystem - Electronic Interlocking. Note: The SCP connection is not affected when PDI connection is disconnected.	
Eu.Gen-SCI.460	Req	It shall be possible to enable or connect the PDI connection to a specific EULYNX field element Subsystem by a trigger to the Subsystem - Electronic Interlocking.
