Coordination and Support Action - DACcord (Migration roadmap towards deployment and related activities) is intended to boost shift to rail in freight transport

Project started in April 2023 (6 partners from 4 countries) and will support EU-Rail in the continuation of the professional management of [European DAC Delivery Programme \(EDDP\)](#) activities, in which European Rail Freight Sector and manufacturers are united to strive for the introduction of a Europe-wide DAC. DACcord will:

- Describe in detail the required migration planning activities, leading to an industrial migration roadmap, since the EDDP's scope concerns the preparation of DAC migration and deployment.
- Collect and report the positions in the European stakeholder landscape, which will support in providing recommended measures to the EDDP stakeholder management team
- Contribute to the alignment amongst the activities shaping the architectural and procedural DAC-related European Railway System, particularly the FP5-TRANS4RM-R

ExpIRes - ESEP4Freight

New European research project ESEP4Freight (European Shift Enabler Portal for Freight) is intended to boost shift to rail in freight transport

Project started in September 2023 (9 partners from 5 countries) and will focus on providing open high-quality and friendly-user static information to all the actors of the supply chain and on testing innovative new tools.

- Create, integrate and validate web-based services integrated in an open-access Web Platform.
- Provide interactive map of the existing European rail freight infrastructure with routes and schedules viewers as well as a CO2 calculator
- Propose recommendations to adapt the current contractual and legal framework in intermodal transport to the needs of the different actors involved in the supply chain
- Bring together a large number of actors of the European logistics system to identify their information needs and to test and disseminate the ESEP4Freight results.
