

# Curriculum Vitae

**GRAF Günter**

## CURRENT POSITION

---

### Name of company

Frequentis AG

### Job position

Vice President Innovation

## PROFESSIONAL BACKGROUND

---

In 2005, Günter joined Frequentis AG, where he has held several key positions over the years. He started in Product Management, where he was responsible for managing the product lifecycle from concept to launch, ensuring alignment with market needs and company goals. His role involved coordinating with R&D, marketing, and sales teams to drive product development and commercialization, as well as conducting market analysis to identify trends and opportunities for new product development.

Later, Günter advanced to the position of Business Unit Director Tower Automation. In this role, he led the business unit in air traffic management.

Currently, Günter serves as the Vice President of Innovation at Frequentis AG. In this role, he spearheads innovation strategies and initiatives to enhance the company's growth and market position in all sectors addressed by Frequentis.

Günter's expertise in the rail industry includes developing and implementing innovative communication and safety solutions for rail transportation systems. He has worked closely with rail operators and authorities to enhance operational efficiency and passenger safety, and has oversighted projects focused on integrating advanced technologies into rail infrastructure, improving reliability and performance.
